### CLUB REPORT

## Jamie's on track for seaplane career

#### » ON-TRACK AVIATION » SEAPLANE RATING

**J**AMIE Furnell has passed the Class Rating Instructor course with On-Track Aviation, enabling him to teach on both land aeroplanes and seaplanes.

On-Track is the only school in the UK offering seaplane instructor courses. Jamie completed his training on Loch Earn in Scotland, using an Aviat Husky A1 amphibious seaplane. It took four days, comprising 12 hours flying and 33 hours groundschool.

Jamie has been flying seaplanes for ten years both

in the UK and USA. He intends to use his qualification working for Neil's Seaplanes, based at Loch Earn.

He told LOOP, "The training was an interesting challenge which makes sense for those who are not striving to become professional pilots. The structured approach and careful teaching was a great help. The course will be of particular interest to those who enjoy teaching. It beats working!"
