

The best of British

In true festive spirit, we celebrate some of the UK's most hardworking flying clubs

WE'D like to take this opportunity to look back over the past year at the great things clubs have done to make your flying experiences more enjoyable. It's a big thanks to those who make flying accessible and fun. Well done!

THE CLUBS...

1. SCOTTISH AERO CLUB

SEAPLANE Ratings are a good way of getting more from your PPL, as the team at Wellesbourne flying school On-Track has shown.

Using the Aviat Husky A1, CFI Alan Newton trained Jamie Furnell so he can now instruct on seaplanes. Jamie is planning to teach at Neil's Seaplanes in Scotland. He is full of praise for the methods used at On-Track and says, "The training was an interesting challenge which makes sense for those who are not striving to become professional pilots. The course will be of particular interest to those who enjoy teaching. It beats working!"
